Experts from Academia/Industry

Prof. P. Sateesh Kumar, CSE Department,
IIT Roorkee

Mr. Lavish Arora, Diginique TechLabs
Expert talks from Industry

Principal Investigator

Prof. Sanjeev Manhas, IIT Roorkee

Get certified by E&ICT Academy, IIT Roorkee

Class will be delivered through
online platform

Why Full Stack Web Development?

Web design is made up of three layers. The user-facing side, or front end, handles the presentation portion of a page, app, or service. The business logic layer, or back end, handles information validation, and the database keeps track of the information exchange. The old days of development saw a big division between front end and back end developers, but as businesses and organizations move towards continuous innovation, a full stack developer is in high demand.

Full Stack Web development has reached continuous innovation. This course introduces you to essential components of taking on end to end development that can help you build critical skills you need.

Objectives of the programme

- Understand the principles of creating an effective web page.
- Become familiar with graphic design principles.
- Develop skills in analyzing the usability of a website.
- Understand how to plan and conduct user research related to web usability.
- Be able to embed social media content into web pages.

Programme Features
